

Sheet wax, additional sizes

You can order any of these thicknesses by entering the item number into the search box in the Shopping cart or Favorites list. These item numbers cannot be added into the main search box on top of all web site pages. That main search box only finds items shown in the online catalog. These items are not shown in the online catalog page because the list is too long.

Adhesive coated wax, 12" x 24" sheet

Thermo-stable wax with pressure sensitive adhesive on one side of sheet. Maximum flexibility for forming quickly and accurately to any contoured surface. Developed primarily for use with tooling plastics to prevent wax deformation under exothermic heat conditions. Firm wax surface provides durability and depression resistance. The natural draping characteristics at room temperature and absence of memory (spring back) eliminate the need to warm or temper wax. Uniform thickness accuracy of $\pm .001$.

Item Number	Thick-ness	Mfg. Number	Sheets Per box	1 box Price	5 box Price	10 box Price
